

## WHAT MAKES CLE DIFFERENT

### Customized Skin Therapy

Each treatment is tailored to your skin's condition, concerns, and goals.

### Professional Skin Mapping

Visible skin patterns and signals help guide a more personalized treatment approach.

### Holistic + Clinical Approach

Treatments combine advanced skincare technology with restorative, barrier-supportive care.

### Focused on Skin Health

The goal is not just short-term glow, but stronger, healthier skin over time.

### Series + Home Care Guidance

When needed, treatment plans can be supported with home care and a recommended series for optimal results.

### BODY TREATMENTS

## About Charlene Lyn Esthetics

Charlene Lyn Esthetics offers customized skincare treatments designed to restore balance, support healthy skin function, and deliver visible results.

Each treatment combines advanced skincare technology with nutrient-rich botanical formulations to address concerns such as acne, rosacea, hyperpigmentation, and healthy aging.

With a holistic approach to skin health, treatments are tailored to strengthen the skin barrier, encourage cellular renewal, and support long-term skin vitality.

## OsmosisMD Skin Therapy

OsmosisMD treatments work beneath the skin's surface using advanced liposomal delivery technology to deliver targeted nutrients directly into the skin.

Each treatment includes **skin mapping**, a professional assessment that evaluates visible skin patterns and signals that may indicate underlying imbalances affecting the skin.

This approach allows treatments to be customized to support skin health and address concerns such as acne, rosacea, pigmentation, and healthy aging while maintaining the integrity of the skin barrier.

Unlike traditional resurfacing methods that can damage the skin, Osmosis focuses on restoring skin function while encouraging collagen production and cellular renewal.
